FRONTEND WEB DEVELOPER

Enthusiastic and results-oriented Frontend Developer with over two years of experience creating interactive, user-friendly web applications. Adept at developing scalable, maintainable, and efficient front-end solutions using React, Next.js, and modern development tools. Skilled in collaborating with multidisciplinary teams to translate complex requirements into polished digital products. Possesses a solid foundation in UI/UX design principles, optimizing both aesthetics and functionality to elevate user experiences. Passionate about adopting cutting-edge technologies to solve real-world problems and deliver value to businesses.

STRENGTHS AND EXPERTISE

Frontend Development

Backend Integration

UI/UX Design

Performance Optimization

Project Management

Collaboration and Teamwork

Adaptability and Learning

Networking

Problem-Solving

PROFESSIONAL EXPERIENCE

Verge System | WebHR

April 2024 – Present

React.js Developer

Demonstrated exceptional technical expertise and leadership in the development of cutting-edge web applications, driving seamless user experiences and scalable architecture. Played a pivotal role in enhancing application performance and integrating third-party services to expand functionality and business reach.

Accomplishments:

- Led the optimization of application load time, achieving a 30% improvement in performance through efficient state management and code refactoring.
- Designed and implemented reusable React components, accelerating development cycles and ensuring consistency across multiple projects.
- Developed and integrated RESTful APIs, improving backend and front-end communication efficiency.
- Actively collaborated with cross-functional teams, ensuring on-time project delivery and exceptional quality assurance.
- Received recognition for introducing best practices in React development, boosting the overall team's productivity.

WebSolve

Nov 2023 – Jan 2024

Frontend Developer

Demonstrated strong foundational skills in frontend development by delivering visually appealing and responsive web applications, meeting and exceeding client expectations.

Accomplishments:

- Delivered 100% responsive designs, ensuring seamless performance across multiple browsers and devices.
- Collaborated with clients to capture project requirements, leading to a 95% client satisfaction rate.
- Built clean, maintainable codebases, reducing future maintenance efforts by 20%.
- Enhanced website usability by incorporating intuitive navigation and design elements.

**GENTEC Soft.
Network Engineer**

Jun 2023 – Sep 2023

Played a critical role in maintaining and improving enterprise network operations. Designed and implemented secure infrastructure, enabling uninterrupted service and improved reliability.

Accomplishments:

- Reduced network outages by 25% through proactive monitoring and advanced troubleshooting techniques.
- Designed and deployed scalable, secure network solutions, supporting enterprise-level operations.
- Documented processes and workflows, providing valuable knowledge-sharing resources for the team.
- Collaborated with IT stakeholders to identify and resolve bottlenecks, achieving a consistent 99% network uptime.

**Yakeenian Education System
Computer Science Teacher**

Dec 2023 – March 2023

Provided engaging and interactive instruction in Computer Science for grades 1 to 10, focusing on fostering logical thinking and problem-solving skills.

**Air Foundation School
Computer Science Teacher**

May 2022 – Aug 2023

Taught Computer Science to students from grades 1 to 10, delivering comprehensive lessons on fundamental concepts, programming basics, and practical applications.

**NAVTTC – National Vocational & Technical Training Commission
Web Designing Teacher**

Feb 2022 – May 2022

Conducted hands-on web design training, equipping students with skills in HTML, CSS, and responsive design principles.

EDUCATION

Isra University, Hyderabad
Bachelor of Science in Software Engineering

Isra University in Collaboration with NAVTTC
Certificate in Graphic Designing

AMIS Academy
Certificate in MS Office

TECHNICAL PROJECTS

E-Commerce Web Platform

Developed a responsive and user-friendly e-commerce web application using React.js, Node.js, Clerk and Tailwind CSS. Designed an intuitive admin dashboard to manage products.

URL: <https://royalhunt.vercel.app>

Portfolio Website

Built a personal portfolio site with Next.js, showcasing development skills, integrating live project links, and demonstrating a strong focus on responsive design and functionality.

URL: <https://ahsanalisoomro.vercel.app>

Blog Management Platform

Developed a dynamic blog website using React.js, Node.js, Clerk, and Tailwind CSS with an admin page for uploading, editing, deleting blogs, and managing categories. Implemented secure authentication and delivered an optimized user interface for seamless content management.

URL: <https://dailyp.vercel.app>

Clinic/Doctor/Patient Management Platform

I developed a comprehensive web application for managing clinics, doctors, and patient profiles using a modern tech stack, including AWS, MySQL, React, and Next.js. The platform allows patients to register, book appointments, and manage their profiles, while doctors can update their schedules and manage patient visits. The admin dashboard provides robust features for managing users and clinic operations.
